STUDY TIPS

This product will provide you Qs and answers carefully compiled and written by our experts. Try to understand the concepts behind the Qs instead of cramming the Qs. Go through the entire document at least twice so that you make sure that you are not missing anything.

Important Note:**Please Read Carefully**

This Real-Exams.net exam has been carefully written and compiled by Real-Exams.net experts. It is designed to help you learn the concepts behind the Qs rather than be a strict memorization tool. Repeated readings will increase your comprehension.

We continually add to and update our exams with new Qs, so check that you have the latest version of this exam right before you take your exam.

For security purposes, each PDF file is encrypted with a unique serial number associated with your Real-Exams.net account information. In accordance with International Copyright Law, Real-Exams.net reserves the right to take legal action against you should we find copies of this PDF file has been distributed to other parties.

Please tell us what you think of our exam. We appreciate both positive and critical comments as your feedback helps us improve future versions.

We thank you for buying our product and look forward to supplying you with all your Certification training needs.

Good studying!

QUESTION NO: 1

What is a Consolidation Policy?

- A. The state of the Policy once installed on a Security Gateway
- B. A Policy created by Eventia Reporter to generate logs
- C. The collective name of the Security Policy, Address Translation, and SmartDefense Policies
- D. The collective name of the logs generated by Eventia Reporter
- E. The specific Policy used by Eventia Reporter to configure log-management practices

Answer: E

QUESTION NO: 2

To change an existing ClusterXL cluster object from Multicast to Unicast mode, what configuration change must be made?

- A. Change the cluster mode to Unicast on the cluster-member object.
- B. Switch the internal network's default Security Gateway to the pivot machine's IP address.
- C. Restart Secure Internal Communications (SIC) on the cluster-member objects. Reinstall the Security Policy.
- D. Change the cluster mode to Unicast on the cluster object. Reinstall the Security Policy.
- E. Run cpstop and cpstart, to re-enable High Availability on both projects. Select Pivot mode in cpconfig.

Answer: D

QUESTION NO: 3

To change an existing ClusterXL cluster object from Multicast to Unicast mode, what configuration change must be made?

- A. Change the cluster mode to Unicast on the cluster-member object
- B. Switch the internal network's default Security Gateway to the pivot machine's IP address
- C. Reset Secure Internal Communications (SIC) on the cluster-member objects. Reinstall the Security Policy
- D. Run cpstop and cpstart, to reenale High Availability on both objects. Select Pivot mode in cpconfig
- E. Change the cluster mode to Unicast on the cluster object Reinstall the Security Policy

Answer: E

QUESTION NO: 4

You have two Nokia Appliances one IP530 and one IP380. Both Appliances have IPSO 39 and VPN-1 Pro NGX installed in a distributed deployment Can they be members of a gateway cluster?

- A. No, because the Gateway versions must not be the same on both security gateways
- B. Yes, as long as they have the same IPSO version and the same VPN-1 Pro version
- C. Yes, because both gateways are from Nokia, whether they have the same VPN-1 PRO version or not
- D. No, because members of a security gateway cluster must be installed as stand-alone deployments
- E. No, because the appliances must be of the same model (Both should be IP530orIP380.)

Answer: B

QUESTION NO: 5

If you check the box "Use Aggressive Mode", in the IKE properties dialog box:

- A. The standard six-packet IKE Phase 2 exchange is replaced by a three-packet exchange.
- B. The standard six-packet IKE Phase 1 exchange is replaced by a three-packet exchange.
- C. The standard three-packet IKE Phase 1 exchange is replaced by a six-packet exchange.
- D. The standard three-packet IKE Phase 2 exchange is replaced by a six-packet exchange.
- E. The standard six-packet IKE Phase 1 exchange is replaced by a twelve-packet exchange.

Answer: B

QUESTION NO: 6

Tess King is the Security Administrator for Acme.com's large geographically distributed network. The internet connection at one of her remote sites failed during the weekend, and the Security Gateway logged locally for over 48 hours. Tess King is concerned that the logs may have consumed most of the free space on the Gateway's hard disk. Which SmartConsole application should Tess King use, to view the percent of free hard-disk space on the remote Security Gateway?

- A. SmartView Tracker
- B. SmartUpdate
- C. SmartView Status
- D. SmartView Monitor
- E. SmartLSM

Answer: D

QUESTION NO: 7

A Security Administrator is notified that some long-lasting Telnet connections to a mainframe are dropped every time after an hour. The Administrator suspect that the the Security Gateway might be blocking these connections. As she reviews the Smart Tracker the Administrator sees the packet is dropped with the error "Unknown established connection". How can she resolve this problem without causing other security issues?

Choose the BEST answer. She can:

- A. increase the session time-out in the Service Properties of the Telnet service
- B. ask the mainframe users to reconnect every time this error occurs
- C. increase the session time-out in the Global Properties
- D. increase the session time-out in the mainframe's Object Properties
- E. create a new TCP service object on port 23, and increase the session time-out for this object She only uses this new object in the rule that allows the Telnet connections to the mainframe

Answer: E

QUESTION NO: 8

By default, a standby SmartCenter Server is automatically synchronized by an active SmartCenter Server, when:

- A. The Security Policy is installed.
- B. The Security Policy is saved.
- C. The user database is installed.
- D. The standby SmartCenter Server starts for the first time.
- E. The Security Administrator logs in to the standby SmartCenter server, for the first time.

Answer: A

QUESTION NO: 9

Acme.com has many VPN-1 Edge gateways at various branch offices, to allow VPN-1 SecureClient users to access Acme.com resources. For security reasons, Acme.com's Secure policy requires all Internet traffic initiated behind the VPN-1 Edge gateways first be inspected by your headquarters' VPN-1 Pro Security Gateway.

How do you configure VPN routing in this star VPN Community?

- A. To the Internet and other targets only
- B. To the center and other satellites, through the center
- C. To the center only
- D. To the center, or through the center to other satellites, then to the Internet and other VPN targets

Answer: D

QUESTION NO: 10

Exhibit:

```
Cluster Mode:New High Availability (Active Up)
```

Number	Unique IP Address	Assigned Load	State
1 <local>	192.168.1.1	0%	down
2	192.168.1.2	100%	active

The exhibit displays the cphaprob state command output from a New Mode High Availability cluster member.

Which machine has the highest priority?

- A. 192.168.1.1, because its number is 1.
- B. This output does not indicate which machine has the highest priority.
- C. 192.168.1.2, since its number is 2.
- D. 192.168.1.2, because its state is active

Answer: A
